Investment Objective

- Long term capital appreciation in real terms.
- Higher risk adjusted returns (Sharpe Ratio) than European equities (MSCI Pan Euro Index).
- Willingness to forego potential returns in order to protect capital.

Asset Allocation

- Total flexibility in equity exposure (0% - 100%) depending on market view and risk. Equities and cash are the only assets.
- Invests mainly in European equities. Some exposure to non european equities allowed by prospectus.

Risk

- Since inception volatility (9.6%) has been 51% of that of European equities.

Fees - Cartesio Y

- Management : 0.75% + 7.5% of annual positive performance (three years to recover losses before performance fee can be applied).
- Custody: 0.055%.
